CALCULATING YOUR ESTIMATE

Use the following equation to determine your total printing cost:

$$X \times Y = \text{Total Printing Cost}$$

X = Row (Shirt Quantity) **x** = Multiply **Y** = Column (Number of Print Colors)

EXAMPLE 1: 300 (Shirts) x \$2.10 (4 Color Print) = \$642

Price Guide reflects the cost per side/image. Each additional printed area (back, sleeve, etc.) will be an additional cost. **EXAMPLE 2:** (Same design Front & Back) **EXAMPLE 1** x 2 = printing cost for 2 sides
